

How many minerals do crops take out of the soil during each growing season?

Sulfur is becoming a deficient trace mineral because air pollution has improved and we are not getting sulfur added to the soil through the atmosphere.

SULFUR

60 Bushels/acre soybeans removes 21 lbs. of sulfur/acre

80 Bushels/acre soybeans removes 28 lbs. of sulfur/acre

150 Bushels/acre corn removes 15-18 lbs. of sulfur/acre

180 Bushels/acre corn removes 18-21 lbs. of sulfur/acre

200 Bushels/acre of corn removes 20-24 lbs. of sulfur/acre

240 Bushels of corn/acre removes 24-28 lbs. of sulfur /acre

MAGNESIUM

60 Bushels of soybeans removes 25-30 lbs. of magnesium/acre

200 Bushels of corn removes 50 lbs. of magnesium/acre
